

# Feminists of Faith

*Schedule file*

Feminists of Faith emerges again!

We constituted around the Houston Conference to make our visible presence and input as religious women in support of the aims and Plan of the Conference. We continued our visibility by sponsoring a fantastic Service and Rally for religious and secular women last March in Washington when President Carter officially received the National Plan of Action.

The visibility, support and input of Feminists of Faith has a chance to be made once more.

On Sunday, July 9th, there will be a National ERA March and Rally in Washington (A fact sheet from NOW, organizers of the event, is attached.) Not only have we been invited to participate as a delegation under the Feminists of Faith banner, but we have been approached for possible platform participation at the rally. As visibility and interpretation have been the goals of Feminists of Faith, we are pleased our presence has been acknowledged and that the participation of religious women sought.

We have a plan!

As Feminists of Faith, we will be in Washington on July 9 under our banner and, hopefully, on the platform. We welcome wide support and participation from all of you in that way. Further, we encourage you, as your denomination, ecumenical or other religious group, to also register as a delegation for this event and join with many of us under the different banners of our various religious identities. (For participation in this way, complete the attached form and return it to NOW. We'd also like to hear from you, so we'll know your group will be represented.)

We hope to see you on July 9th as we extend our visible presence and support, representing all religious women for the ERA.

FEMINISTS OF FAITH COORDINATORS:

*Gail D. Hinand*  
Gail D. Hinand  
Church Women United

*Joan M. Martin*  
Joan M. Martin  
National Council of Churches

P.S. If you're curious about your receiving this mailing - we have been working on a "master list" of religious women from many and various groups; this represents our first use of the total list!
